

International Maritime Research Confluence

**IMRC
2020**

Organized by ISF Institute of Research & Education (IIRE)

<https://researchconfluence.iire.in/>

The organizer IIRE (<http://www.iire.in/>) is a division of Inner Search Foundation (<http://inner-search.org/>) a non-profitable charitable trust founded on 13th November 2000 under the Bombay Public Trust Act 1950

Entering 2020 with a new resolution

With the Organizing Group on the threshold of entering the third decade, the trustees and directors of the group entities resolved in March 2019 to dedicate the decade 2020-2030 in pursuit of supporting the Sustainable Development Goals set by the United Nations in 2015.

“The Sustainable Development Goals are the blueprint to achieve a better and more sustainable future for all. They address the global challenges we face, including those related to poverty, inequality, climate, environmental degradation, prosperity, and peace and justice.”

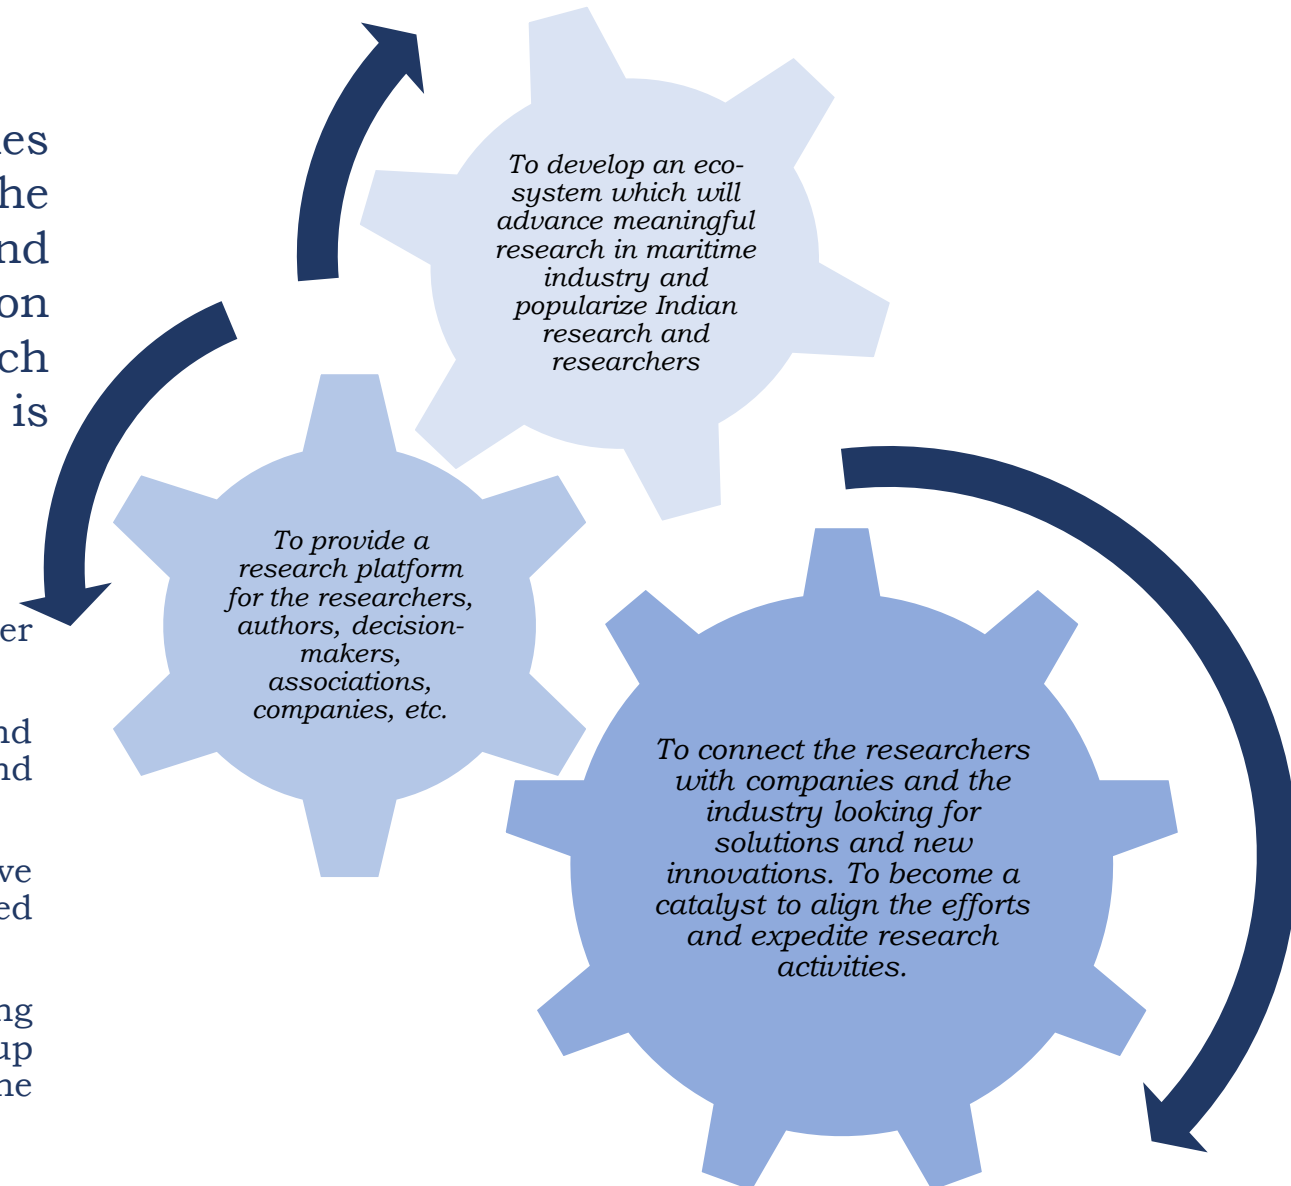

Aims and Resolution of the IMRC

With the SDGs as the newly adopted goals, outcomes of the 2019 Knowledge Seminar and relying on the expertise of the group in research activities and publications, our research enterprise embarks on organizing International Maritime Research Confluences (IMRC) from 2020 onwards. The IMRC is a 10-year project with biennial symposiums.

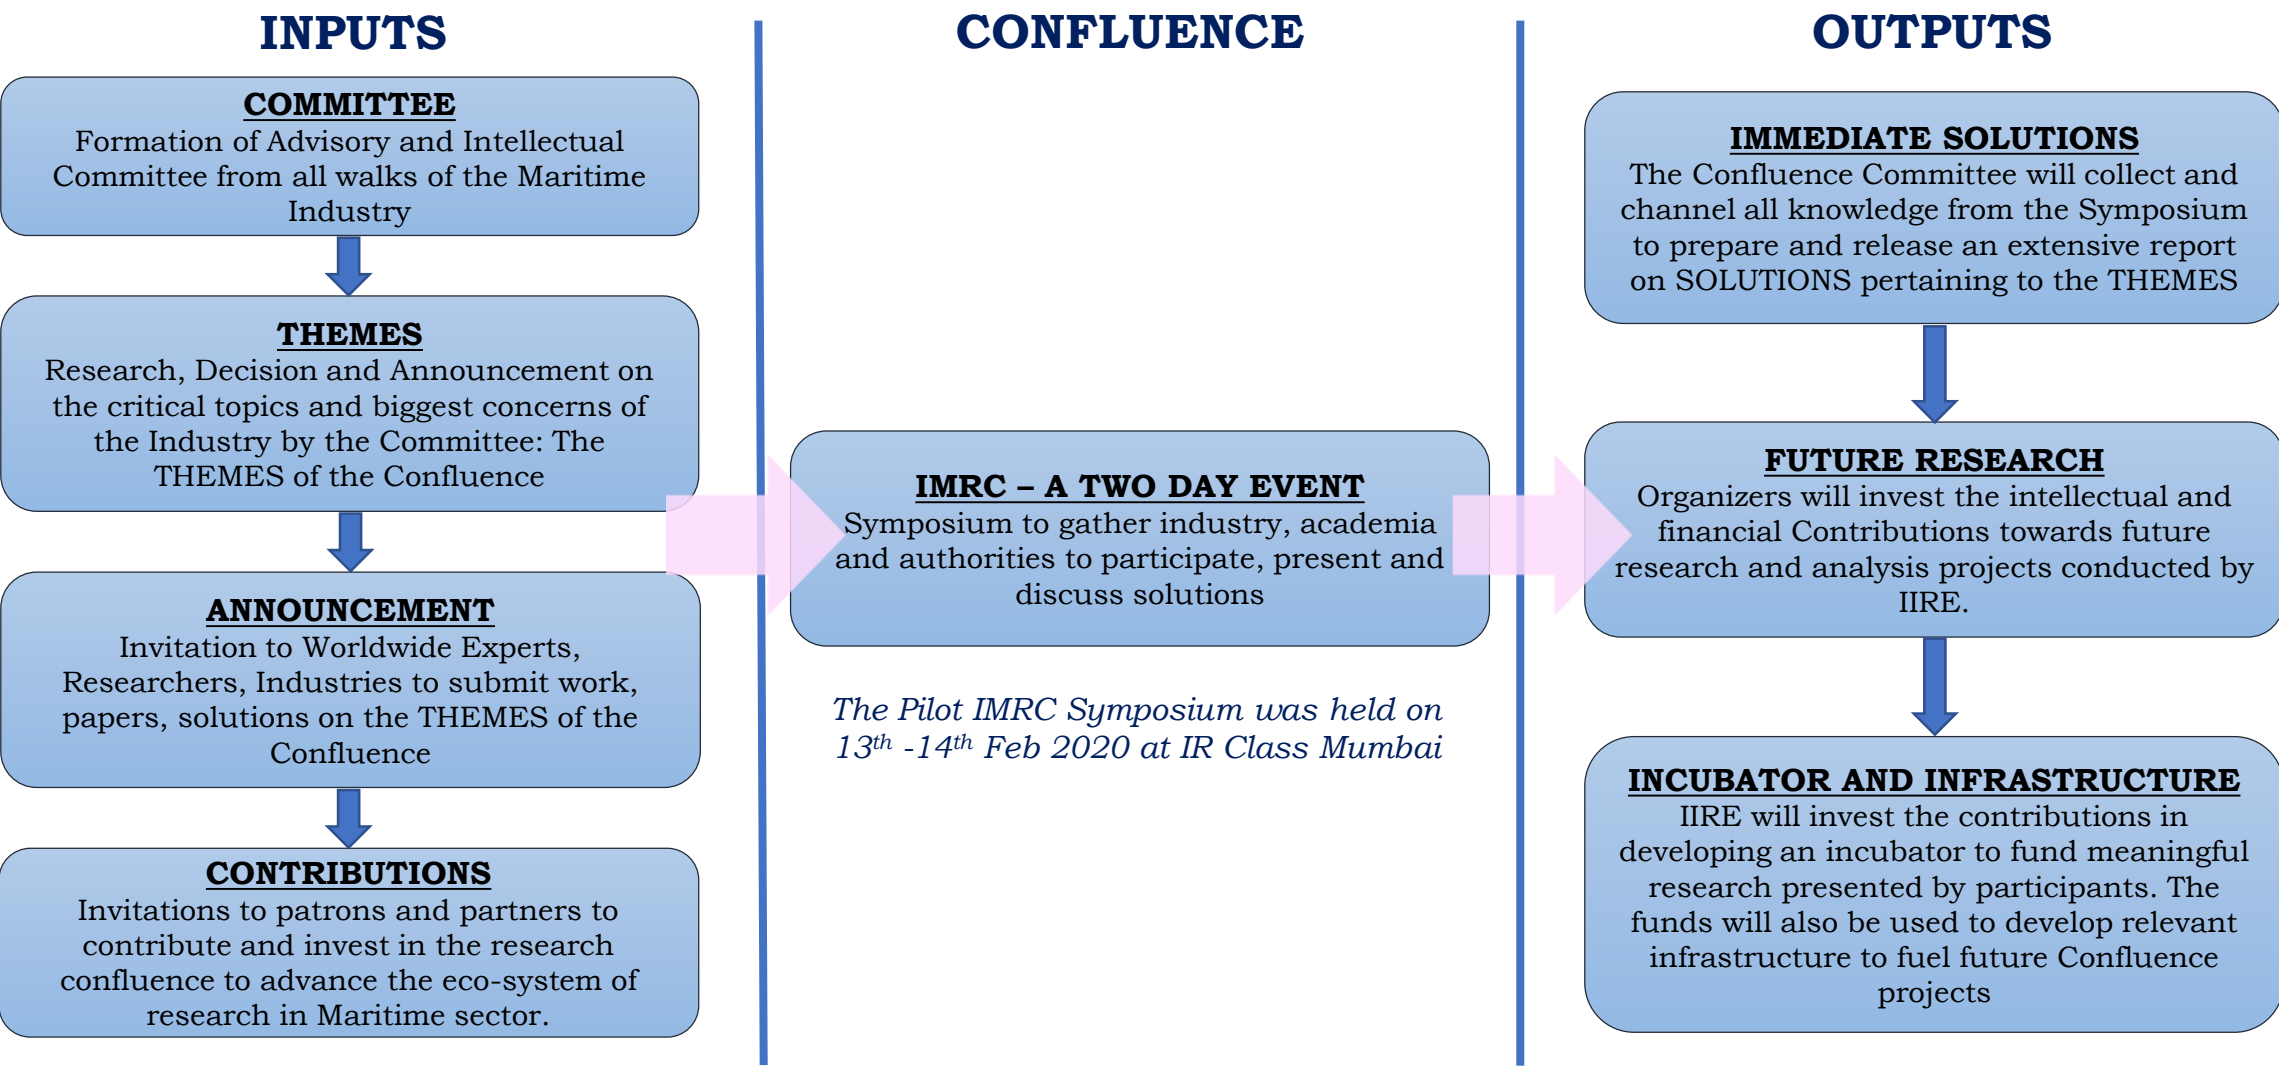

Within the framework of the SDGs, the objectives of IMRC are:

- To bring in industry players on a common platform for a larger cause.
- To hold the confluence for presentations, deliberations and discussions on areas of concern, which matter to the industry and to humanity at large.
- To disseminate knowledge on proceedings, to create effective exchange of information and knowhow within the industry related to the issues which need attention in future.
- To enable further study on topics of relevance by supporting genuine researchers who may lack the resources to take up projects which will ultimately benefit the industry and the humanity at large.
